

From TruQC and Carboline

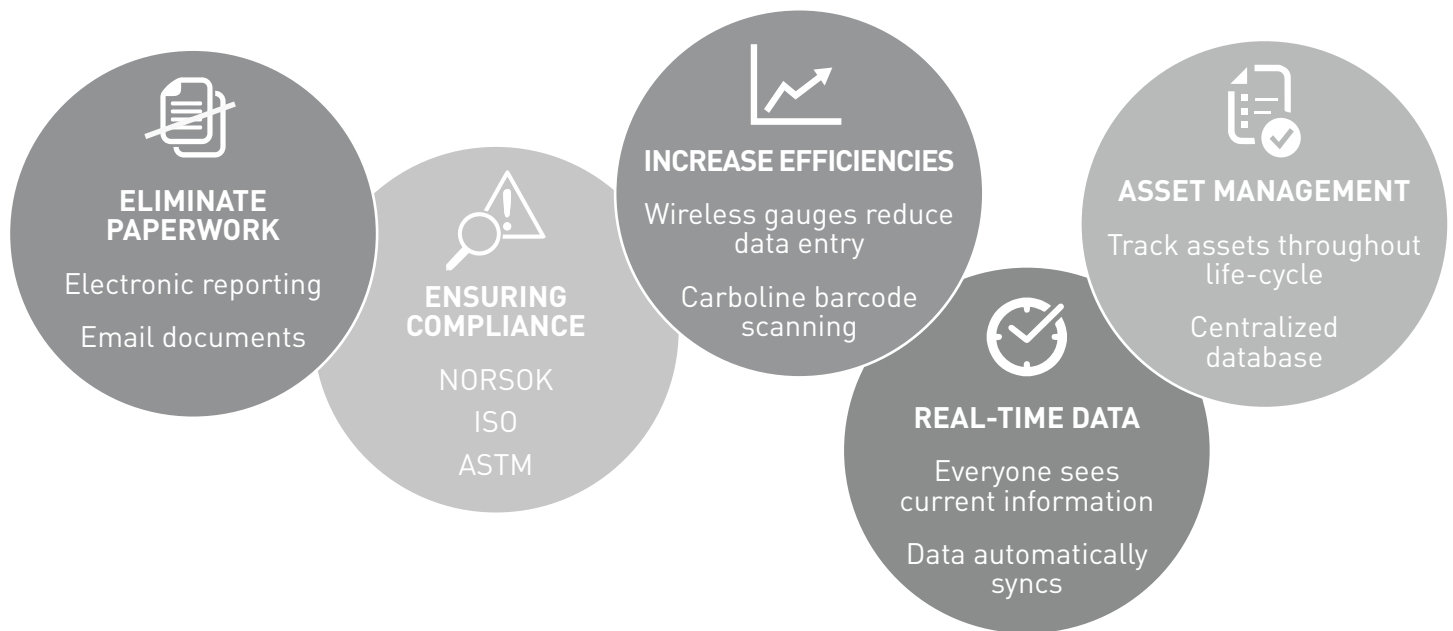

Nothing is more important to your success than seamless collaboration and communication.

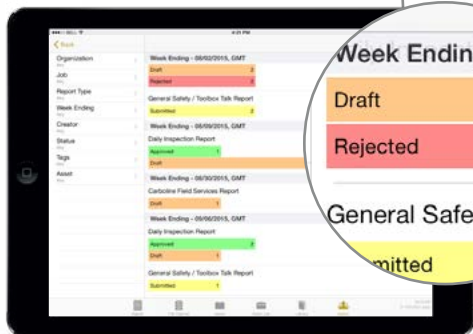

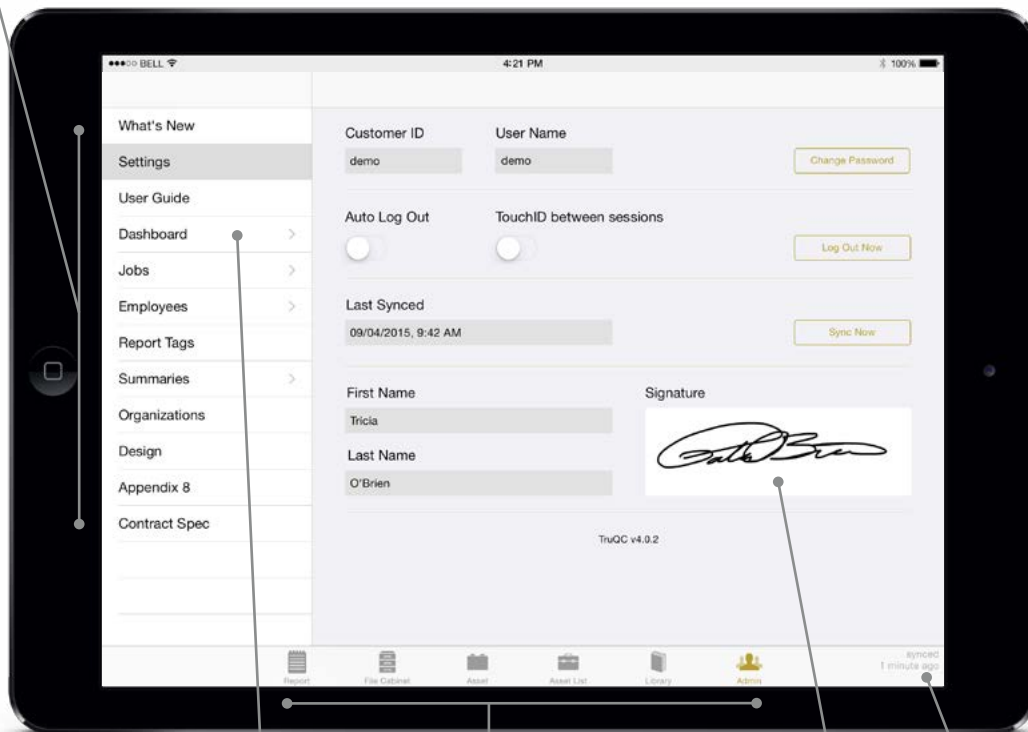

You must have a grasp on every person, every project and every single asset you own. Each needs to be documented and stored for reference and review. Enter TAM (Total Asset Management), software exclusively from TruQC and Carboline.

TAM is industry changing software that offers real-time reporting eliminating the need for time consuming paperwork. TAM helps create a centralized database, telling the full life story of each and every asset. TAM solves the documentation and management issues that owners face with one simple, integrated solution.

TAM answers the needs of customers looking for a way to save time and keep the job site running smoothly. TAM combines daily workflow documentation with the ability to manage each and every asset at a facility.

Intuitive left side navigation changes based on icon selection

Data is automatically saved and synced to server

TAM's automated features were designed to streamline the reporting process. The reports cut back on manual data-entry with bluetooth gauges and barcode scanning technology. Reports can be seen in real-time as they are being completed, making it easy to monitor status and ensure completion.

# Reporting

Quality control

Safety

Asset tracking by report, job, employee

Asset summaries

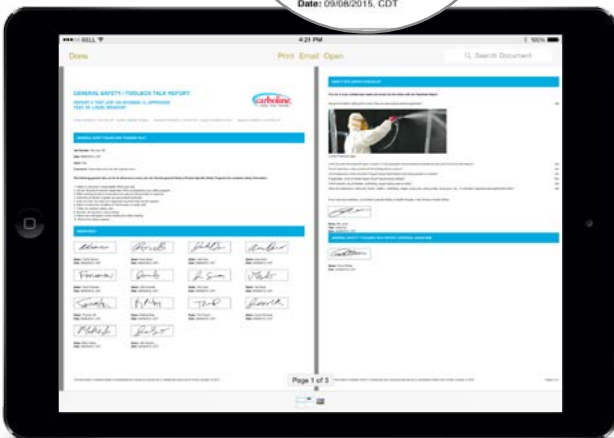

Daily inspection

Time and materials

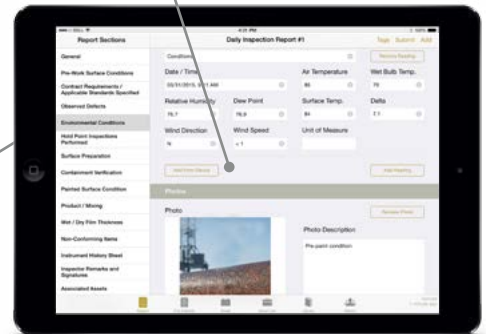

Maintenance

Custom reports also available

TAM generates formatted reports that can be emailed or printed directly from the app

Bluetooth enabled gauge takes readings and populates fields wirelessly

With TAM's unique barcode scanning technology, customers can retrieve key batch information by scanning a Carboline product. The information imported includes product and batch data.

Permission based access, gives employees and vendors access to only the assets and reports that pertain to them. This simplifies documentation and ensures data security. Managing teams has never been easier.

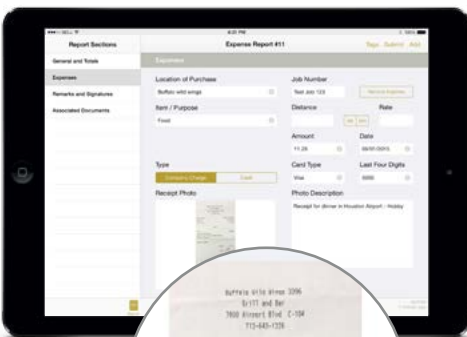

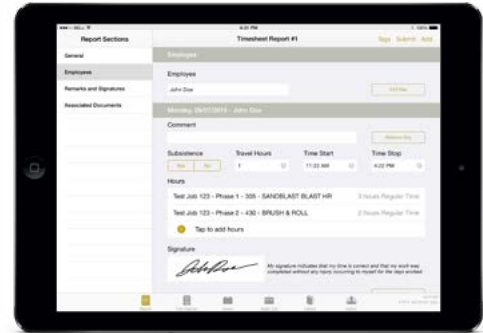

# People

Time sheets

Expense reports

Employee profiles

Toolbox Talk: training and safety guidelines

Simplify expense reports by using the iPad camera to attach receipts

Status

Active

Inactive

Employees can be changed from active to inactive depending on employment status

Comp Code

Employees signature indicates Toolbox Talk has been completed

TAM makes project management seamless by storing all necessary reports and project information in one easy to access location. Employees, assets, and documents can be associated with each job creating a complete history from start to finish.

# Projects

- Asset receiving
- Work order
- Document library

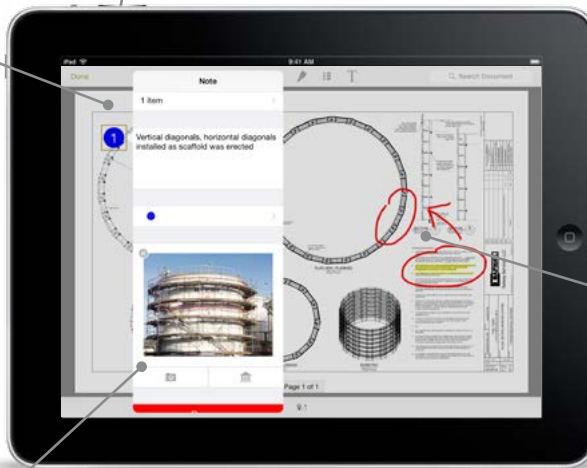

Carboline product data sheets (PDS) and safety data sheets (SDS) are automatically imported for easy up-to-date information

Incident: take pictures, record statements and signatures of involved parties

Daily Inspection Report: make notes, upload blueprints, specs and project photos from work-site

Create punch list items and tie to documents

Annotate directly on documents

Take pictures directly in TAM with the built-in camera, or pull from photo library

TAM gives owners the ability to manage all aspects of a facility including people, projects and assets right at your fingertips, this is a total asset management solution.

# Assets

Asset administration

Track maintenance records

Assign assets to specific employees

Asset organization
